## **UNIRAC AND SOLCO CHOICE ELECTRIC UNVEIL CLICKSYS™ IN AUSTRALIA, THE NEXT GENERATION IN RESIDENTIAL PV MOUNTING TECHNOLOGY**

***CANBERRA, July 30 2009:* Solco Choice Electric – one of Australia’s leading and oldest solar system wholesalers, and Unirac Inc. - North America’s leading manufacturer of solar photovoltaic (PV) mounting solutions, today announced the launch of CLICKSYS™ in Australia. This is an innovative new click-system mounting solution offering better value and installation ease for flush roof residential PV market.**

Engineered for flush roof mounting applications, CLICKSYS™ offers superior aesthetics with great value and is easily installed on most roofing types, including colourbond and tiles.

The unique design of CLICKSYS™ solution allows installers to simply click connections at an approximate location, and then slide the connection to the exact rafter location for final attachment to the roof, eliminating the use of bolts and nuts.

“Our customers have come to count on Unirac’s innovation to deliver the most installer-friendly PV mounting technology in the industry” said Douglas May, Unirac CEO. “We are pleased to deliver CLICKSYS™, our most economical residential solution on the market today.” “We are committed to fueling the renewable energy industry by finding new ways to deliver technology at reduced costs,” he added.

“This will make installing solar power systems in Australia easier and quicker”, commented Mark Norman, CEO and Managing Director of Solco Ltd. We believe that this addition to our suite of offerings through our wholesale subsidiary Choice Electric Co (Aust) will be another facet of our drive to bring the cost of Clean Green Energy, as generated by solar power systems, down to a level to challenge Black Energy costs at point of sale in the domestic market

Featuring an unprecedented number of attachments for tile and shingle roofing type, CLICKSYS™ offers installation freedom and flexibility on a variety of roofing types and supports most PV modules.

## **Background**

### **Solco Ltd**

Solco began in 1989 and listed on the Australian Stock Exchange in 2000. In 2005, Solco acquired Choice Electric Co (Aust) P/l. Now known as Solco Choice Electric, it undertakes the Group's wholesale solar power and pumping operations. Solco undertakes major solar energy projects for clients in remote and urban areas.

Solco's main activities are in the wholesale and distribution of solar power and pumping solutions around Australia and overseas, supplying imported and locally-sourced products through subsidiary Solco Choice Electric. We cater for corporate and government clients directly; residential and rural customers are looked after by our installer network. Solco is listed on the [Australian Stock Exchange](#).

Solco Choice Electric is one of Australia's largest, oldest and most respected wholesalers of solar power and solar water pumping systems. Today, as a fully-owned subsidiary of Solco Ltd, it has offices and warehouses in Brisbane, Perth, Melbourne and Murwillumbah, reliably providing its national customer network with quality equipment and technical support.

### **UniRac**

Based in Albuquerque, New Mexico, Unirac ([www.unirac.com](http://www.unirac.com)) was founded in 1998 and quickly became the industry leader with a reputation for superior mounting solutions, responsive support and outstanding services. Speed and high-quality installation options are the trademarks of all our PV mounting solutions. Unirac delivers innovation, on time, and with award-winning results.

By partnering with the industry's premier integrators and distributors, Unirac delivers custom-designed solutions using highly engineered mounting technology, backed by excellent end-to-end technical support.

Since delivering its first PV mounting system in 1998, Unirac has experienced remarkable growth of its innovative and superior racking systems. We continue to be selected for many prominent installations such as the Google Campus in Mountain View, California, the largest corporate solar installation in the U.S. to date; as well as Universal Studios, in California, just to name a few.
